LED SOLAR MULTIFUNCTIONAL FLOOD LIGHT

The Solera Solar Lighting Multifunctional Flood Light features a flexible design, the lamp can be used separately or connected to the solar panel.

- Perfect for transit stops, schools and garages.
- Two operating modes:
 - Mode A** - Constant lighting mode. Used when lamp is not connected with the solar panel. Can be set at 30% or 100% brightness
 - Mode B** - Sensor mode. Used when lamp is connected to the solar panel. Automatically turns on to 100% when motion is detected (within 18 ft.) and then turns to 5% when no motion is detected
- Comparable to 70W HID.
- 5m cable between panel and lamp.
- PIR Sensor included.
- Battery indicator shows when the battery is at 25%, 50%, 75% and 100%
- Li-Ion battery lasts at least 1500 charge cycles and is replaceable.
